

KNOX-BOX Rapid Entry System

Cut response time, property damage and key liability.

Access the Complete, UL Listed KNOX-BOX Rapid Entry System with One Master Key.

KNOX-BOX® has been providing firefighters with safe and secure emergency access since 1975. Nationwide, more than 7,000 fire departments depend on the KNOX-BOX Rapid Entry System to access commercial and residential properties when responding to fire alarms or medical emergencies.

Knox rapid entry devices are purchased by property owners in your jurisdiction. There is no cost to the fire department. With

one Knox® Master Key, community buildings, gated complexes and fenced properties are immediately accessible. The versatile KNOX-BOX Rapid Entry System provides:

- Immediate building entry day or night
- Access to all properties with one master key
- Time-saving response to false alarms
- Safe entry without force or injury to firefighters

KNOX-BOX

The leading high security, heavy-duty key box is used for most commercial applications including businesses, schools, government and public buildings, and community associations. 3200 Series Knox-Boxes, with lift-off or hinged doors, hold keys, access cards and small entry items.

3 2 0 0 Series

KNOX-VAULT

Knox-Vaults are used for high security storage in larger businesses, industrial properties, public buildings, and universities. The heavy-duty 4400 Series Vault protects and stores building keys, access cards and floor plans for emergency entry. Vault options include a single or dual lock for access by the fire department and a second emergency agency.

4 4 0 0 Series

KNOX KEY SWITCH

Gated communities, apartment complexes, parking garages, pedestrian gates and gated industrial receiving areas are just a few applications of the Knox electric override key switch. It can be ordered with single or dual locks for fire, EMS and law enforcement access.

Key Switches

KNOX PADLOCK

Knox heavy-duty, brass bodied, Exterior Padlocks secure any type of perimeter or fire access gate. These harsh-weather padlocks are equipped with a stainless steel shackle, an EPDM rubber seal and body cover, and an all-metal lock cover. The hardened steel Knox Interior Padlock secures interior fire sprinkler valves, equipment controls and utility storage areas.

Padlocks

KNOX CABINET ^{UL}

Knox cabinets provide onsite, high security storage for MSDS, Haz-Mat data, pre-fire plans and key storage. Used by industrial and commercial sites as well as universities and government installations, the 1300 Series Cabinet is UL listed against physical attack and meets SARA Title III storage requirements for chemical data.

1300 Series

KNOX RESIDENTIAL ^{UL}

(For Residential Use Only) The 1650 Series Knox-Box holds one or two keys and is used for fire and medical emergency entry into gated communities, single-family residences and apartment complexes. Options include a lift off door, a hinged door and a hanging door bracket for emergency access during temporary medical situations.

1650 Series

KNOX LOCKING FDC CAPS

Lock out potential FDC vandalism and maintain control of fire department sprinkler connections with the long-lasting Knox FDC Cap™. The stainless steel 2.5" male NST plugs and 4" or 5" hard anodized aluminum Storz caps are easily locked or unlocked with a Knox Keywrench™. Various other cap sizes and threads are available upon request.

FDC Caps

KEYSECURE MASTER KEY RETENTION

KeySecure™ is a keypad-controlled unit that retains the Knox® Master Key in emergency vehicles. Fire department personnel simply enter their authorized pin code and a Knox Master Key is released for service. Once secured, the key is locked in place until the next pin code is entered to authorize key release.

KeySecure is available in three models: KeySecure 3 units are programmed and controlled by an audit trail database from a central PC or laptop station. Each unit can hold up to 500 pin codes that are easily modifiable using KeySecure's PC based software with Microsoft® Windows 2000 or XP. A data cable is used to transfer audit trail activity events from the KeySecure unit to a laptop or Palm device.

KeySecure 1 and 2 are key retention units without the audit trail feature for those departments that require a simple but secure method of key accountability. As many as 100 pin codes can be programmed into each unit using its illuminated keypad. Adding or deleting key release pin codes is also accomplished at the unit.

KeySecure

SENTRALOK MASTER KEY SECURITY

Sentralok™ combines master key security with the convenience of rapid entry. The Knox Master Key is retained and controlled by a Sentralok Decoder in department apparatus until required during emergency response. An on-scene firefighter radios dispatch to transmit a unique radio signal to the Decoder to release the master key. Full audit trail capability coming third quarter 2004.
