

Dimensions = mm

Input: EUROPLUG
220/240V AC 55W

**Step Down
Transformer**

Output: NEMA 1-15R
110/120V AC 50/60Hz

Foreign electricity (220/240V) is different from U.S. electricity (110/120V). To use your travel appliances overseas you must use a converter to reduce foreign electricity, otherwise your appliance will not operate.

Changes 220V foreign electricity to 110V U.S. electricity for appliances using from 0 to 55 Watts e.g. Answering Machine Device, Tape Recorder, Calculators, Cassettes, Radios, Walkman, Player, Electric Shavers, Camera, Strobes, Recharges AC Adaptor etc.

DO NOT USE 55W Converters to operate travel appliances exceeding 55 Watts !!! e.g. Hair Dryers, Hairsetters, Coffee Cup, Heaters, Irons, Contact Lens Sterilizers, Clothes Steamers etc.
