

Quad Lights

Portable, wide-area lighting with ease and durability

Applications

- Aircraft manufacturing and maintenance
- Shipyards
- Manufacturing equipment service
- Maintenance and repairs
- Utilities

NEW!

Ideal for stand-alone or “daisy chain” use in demanding industrial and commercial applications.

Options:

- Four 17- or 32-watt fluorescent lamps.
- Standard SJOW 6' (1.83m) and 25' (7.62m) cord length. Other cord length available upon request.
- Flexible mounting systems including standard straps; optional non-metallic clamps and magnetic system also available.
- Standard reflective tubeshields; also available with clear tubeshields.
- Specialty lamp colors available upon request.
- 120 – 277 VAC, 50/60 Hz configurations available upon request.

Don't compromise on the quality of wide-area, temporary lighting in tough applications with **Quad Lights**.

These rugged **Quad Lights** provide twice the light output of similar products, but are 20 percent lighter in weight. Integrated, covered outlets allow daisy chaining for lighting flexibility.

A multi-level lamp protection system provides extreme durability with rubber end caps and field-tested lamp shock absorbers. Parallel wiring keeps other lamps functioning should one fail.

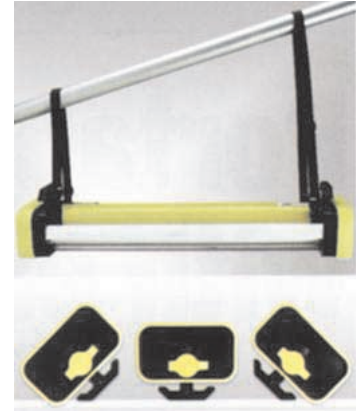

Available in 17- and 32-watt models, these rugged Quad Lights feature:

- Lamp shock absorbers and impact-resistant coated lamps protect against breakage due to accidental drops and falls.
- Relamp on site using finger-nut screw ... no tools required.

Quad Lights are tougher than your toughest wide-area lighting needs.

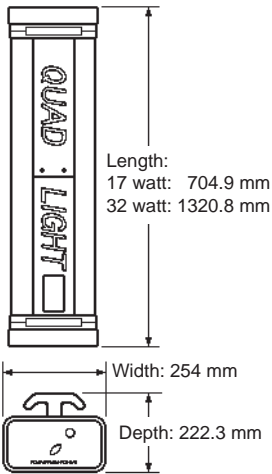

Features

- Flexible installation options include:
 - Hanging from level or angled beam;
 - Standing (horizontal); or
 - On floor (vertical) with 45° angled stand for optimal lighting.
- Feed-through units can be daisy chained.
- Protected on/off power switch.

- In the unlikely event that a lamp breaks, tool-free relamping gets you up and running in minutes.
- Integrated cord storage system.
